Annual Production Sale

Selling: 25 Powerful Simmental Yearling Bulls 29 Simm Angus Composites

Monday, February 10, 2020 1:00 P.M.

Kimball Livestock Exchange Kimball, South Dakota

Sale Day Phone 605-778-6211

STORM DATE: FEBRUARY 17, 2020

Welcome Cattlemen:

This past year has definitely tested our fortitude with flooded pastures, prevent planting and muddy feedlots. We've learned that there are always alternative ways to get the job done. Our calves weaned lighter this year and that seemed to be common among other producers I visited with. This new year has started out a little better. Let's hope we get back to a more normal weather pattern.

We were blessed this fall with two new grandsons to join our two beautiful granddaughters.

We started breeding Simmental cattle 46 years ago and have strived to produce what the commercial cattleman needs. Calving ease, along with performance and good disposition, are the goals we strive for in each calf crop. Our bulls are raised like most commercial operations with only mama's milk and NO CREEP feed. The calves were weaned the end of September and fed a TMR of ground hay, corn silage, corn and distillers along with mineral supplement. The 48 meg/cal ration was fed to the bulls all fall and winter. We aim for 3 - 3.5 lb gain a day. We have many customers who like the longevity of our bulls. We will again winter the bulls free of charge until April 15 and semen test at no charge. We will take \$150 off if you take your bulls home sale day. Videos of all the bulls will be online at bendaranch.com and DV Auction site in late January. Our entire cow herd is enrolled in the American Simmental Association Total Herd Enrollment (THE) which gives us accurate complete ratios on BW, WW, YW and all Expected Progeny Differences (EPS's) on 15 measurable traits. We have used THE program since it's inception. All bulls are polled in our sale and most should be homozygous polled by pedigree. Several bulls are being tested for homozygous black but at catalog time results are not back.

Thank you for your past patronage and we look forward to seeing you Feb. 10.

**ALL VIDEO
AUCTION**

**Come early to view
the bulls in their pens.**

Buying online is as easy as 1, 2, 3...

1. Create an account at www.dvauction.com under the "register" tab
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction-a DV representative will notify you once you have been approved
3. Tune in for the sale and make your purchases!

After the sale, contact the sale manager or owner to arrange transportation and payment. **High speed internet** is required for successful bidding-be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy Bidding-if you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

Having troubles?

During the auction, you can type a message to the operator at any time for assistance. Our full-time support team can also always be reached at (402) 474-5557.

Schedule:

Sunday, Feb. 9	Cattle on display
Monday, Feb. 10	8:00 A.M. Cattle on display
	11:00 A.M. Complimentary Lunch
	1:00 P.M. Benda Ranch Sale

Sale Staff:

Colton Buus, ASA Area Rep.	605-214-3532
Dennis Ginkens, Tri-State Livestock News.....	406-670-9839
Jeff Kapperman, The Neighbor	605-940-5104
Jim Scheel, Cattle Business Weekly	605-545-1521
Chad Heezen, Kimball Livestock Auction.....	605-870-0697
Wade Christensen, Kimball Livestock Auction	605-730-1801
Dick Deffenbaugh, Kimball Livestock Auction ...	605-680-1324
Justin Dikoff, DVAuction	605-290-0635
Wayne Tupper	605-680-1000

Auctioneer:

Justin Tupper	605-680-0259
---------------------	--------------

Motel Accommodations:

Dakota Winds Motel ..	605-778-6215 or 1-888-751-1265
Regency Inn & Suites.....	605-778-6088

EPDs:

Please note these EPDs will update periodically. Catalog EPD's are from December 2019.

Announcements:

Announcements made sale day take precedence over printed material in the sale catalog. Anyone attending this sale attends at their own risk. Benda Ranch and sale force will not be held responsible for any personal injury while attending this sale.

Terms of Sale:

Terms of sale are cash and the new owner is responsible for the bulls following the sale. Please let the sale clerks know if you plan on hauling your bull home sale day or if you want Jim to take them home to be wintered.

Insurance forms will be available from Ray Trudeau of Martin-Trudeau Insurance Company. (605-996-3106) Mitchell, SD.

Semen:

Benda Ranch retains 1/3 revenue sharing interest in semen sold from bulls in this sale.

Health:

May	Bovi-Gold One Shot Combo Vision 7 Somnus
Sept	Bovi Gold One Shot Combo Vision 7/Somnus

Booster at weaning and poured with Cydectin and Clean Up. All bulls are free of genetic defects.

Trucking:

Benda Ranch will assist buyers in making the most economical trucking possible.

Wintering the Bulls:

Free wintering until April 15 and semen test or \$150 off if you take them sale day. However, we will not be responsible for injury or death to the bulls.

Feeding & Test:

The bulls were raised with **NO** creep feed. They have been wintered on high roughage ration of corn silage, dried distillers, ground alfalfa-hay mix, corn and mineral supplement designed for developing bulls. Bulls were on a 100 day test for A.D.G.

Guarantee:

All bulls are guaranteed through the first breeding season (90 days after turn out.) We strongly encourage you to purchase accident, sickness and disease (ASD) infertility insurance. We will pay \$250 towards insurance on one bull per customer. If an injury to a bull is not covered under insurance during this 90 day period, we will attempt to provide a suitable replacement bull. If one of equal value cannot be provided, we will issue a sale credit to be used in a future sale. This credit will be equal to the purchase price minus the salvage value of the animal. Please contact us as soon as possible after a condition is observed that prevents the bull from being able to function as a breeder, and before he is sold.

Directions to Sale Facility:

Sale facility is located on the northeast edge of Kimball, S.D.

Thank You:

Special thanks to Case Blom, Leroy Blom and Rudy Niewenhuis of Professional Alliance, Platte, SD for helping sponsor and serving the lunch.

Quick Reference to ASA EPDs and \$ Indexes

Expected Progeny Differences (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing what units they are expressed in. For example, if the above case referred to weaning weight EPDs, A would be expected to sire 15-pounds more *weaning weight* than B. If calving ease were the trait, A would be expected to sire 15-percent more *unassisted births* in first-calf heifers; in other words, if B sired 30 assists in a group of 100 heifers, we'd expect A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit www.simmental.org. Listed below are the units ASA EPDs are expressed in:

All-Purpose Index (API): Dollars per cow exposed under an all-purpose-sire scenario. (See below for more details.)

Back Fat (BF): Inches of backfat.

Birth Weight (BW): Pounds of birth weight.

Calving Ease (CE): Percent of unassisted births when used on heifers.

Carcass Weight (CW): Pounds of carcass weight.

Maternal Calving Ease (MCE): Percent of unassisted births in first-calving daughters.

Milk (MLK): Pounds of weaning weight due to milk.

Marbling (MRB): Marbling score.

Maternal Weaning Weight (MWW): Pounds of weaning weight due to milk and growth.

Ribeye Area (REA): Square inches of ribeye.

Warner-Bratzler Shear Force (WBSF): Pounds of force required to shear a steak.

Stayability (STAY): Percent of daughters remaining in the cowherd at 6 years of age.

Terminal Index (TI): Dollars per cow exposed under a terminal-sire scenario. (See below for more details.)

Weaning Weight (WW): Pounds of weaning weight.

Yearling Weight (YW): Pounds of yearling weight.

Yield Grade (YG): Yield grade score.

\$ Indexes: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

All-Purpose Index (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

Terminal Index (TI): Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield.

Using API and TI: First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years (\$50 diff. x 30 hd. x 4 yr. = \$6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit www.simmental.org.

Important disclaimer: DO NOT compare index values of purebreds of different breeds, hybrids of different breed composition or purebreds with hybrids - our system was not developed to make valid comparison among these groups. Therefore, you must first determine the breed and breed composition appropriate for your herd and use index values to compare animals within that population.

Dam: 2 calves/110 WWR

We think this is one of Casino's best set of bulls ever. This is his last group of natural service calves as he just wore out at 8 1/2 years. This calf has really put it all together. Weaning ratio of 115 and didn't stop there. I think his young dam is destined to be one of our best.

Dam: 4 calves/96 WWR

Something different here. In spring of 2018 we ordered WCS El Dorado semen (Simmental bull), unknowingly we got TH El Dorado, a polled Hereford bull. The calves are really good, just not what we were expecting. They grew really well. We call them "Sim-Fords".
