Annual Production Sale

Monday, February 8, 2021 1:00 P.M.

Kimball Livestock Exchange Kimball, South Dakota
Sale Day Phone 605-778-6211

STORM DATE: FEBRUARY 15, 2021

Welcome Cattlemen:

We have been blessed with a great fall and early winter in south central South Dakota. It has been great for those of us in agriculture to catch up from the past couple years. We even built new pasture fence the middle of December. I don't think we've ever done that before. We started breeding Simmental cattle 47 years ago and have strived to produce what the commercial cattleman needs. Calving ease, along with performance and good disposition are the goals we strive for in each calf crop.

Our bulls are raised like most commercial operations with only mama's milk and NO CREEP feed. The calves were weaned the end of September with heavier weaning weights than last year. They are fed a TMR of ground hay, corn silage, corn and a protein pellet supplement. We aim for a 3 - 3.5 lb. gain a day.

We have many customers who like the longevity of our bulls. We will again winter the bulls free of charge until April 15 and semen test at no charge. We will take \$150 off if you take your bulls home sale day. Videos of all the bulls will be online at bendaranch.com and DV Auction site in late January. Our entire cow herd is enrolled in the American Simmental Association Total Herd Enrollment (THE) which gives us accurate complete ratios on BW, WW, YW, and all Expected Progeny Differences (EPD's) on 15 measurable traits. We have used THE program since it's inception. All bulls are polled in our sale and most should be homozygous polled by pedigree. Many of the bulls were tested for homozygous black and will be noted in the footnotes.

Thank you for your past patronage and we look forward to seeing you February 8.

Front row: Jim with Braxton, Riley (in front), Peyton, Sue with William, back row: Andrea, Ryan, Jay, Joey, Lauren

Schedule:

Sunday, Feb. 7 Cattle on display
Monday, Feb. 8 8:00 A.M. Cattle on display
11:00 A.M. Complimentary Lunch
1:00 P.M. Benda Ranch Sale

Sale Staff:

Dennis Ginkens, Tri-State Livestock News..... 406-670-9839
Jeff Kapperman, Tri-State Neighbor 605-940-5104
Jim Scheel, Cattle Business Weekly 605-545-1521
Chad Heezen, Kimball Livestock Auction..... 605-870-0697
Wade Christensen, Kimball Livestock Auction 605-730-1801
Dick Deffenbaugh, Kimball Livestock Auction ... 605-680-1324
Justin Dikoff, DVAuction 605-290-0635
Wayne Tupper 605-680-1000

Auctioneer:

Justin Tupper 605-680-0259

Motel Accommodations:

Dakota Winds Motel .. 605-778-6215 or 1-888-751-1265
Regency Inn & Suites 605-778-6088

EPDs:

Please note these EPDs will update frequently. To look up the current EPD's go to Animal Search on simmental.org.

Announcements:

Announcements made sale day take precedence over printed material in the sale catalog. Anyone attending this sale attends at their own risk. Benda Ranch and sale force will not be held responsible for any personal injury while attending this sale.

Terms of Sale:

Terms of sale are cash and the new owner is responsible for the bulls following the sale. Please let the sale clerks know if you plan on hauling your bull home sale day or if you want Jim to take them home to be wintered.

Semen:

Benda Ranch retains 1/3 revenue sharing interest in semen sold from bulls in this sale.

Health:

May Bovi-Gold One Shot Combo
Vision 7 Somnus
Sept Bovi Gold One Shot Combo
Vision 7/Somnus

Booster at weaning and poured with Cydectin, Clean Up, and dewormed with Safe-Guard. All bulls are free of genetic defects.

Trucking:

Benda Ranch will assist buyers in making the most economical trucking possible.

Wintering the Bulls:

Free wintering until April 15 and semen test or \$150 off if you take them sale day. However, we will not be responsible for injury or death to the bulls.

Feeding & Test:

The bulls have been wintered on a high roughage ration of corn silage, ground alfalfa/hay mix, corn and pelleted protein/mineral supplement. Bulls were on a 90 day test for ADG.

Guarantee:

All bulls are guaranteed through the first breeding season (90 days after turn out.) We strongly encourage you to purchase accident, sickness and disease (ASD) infertility insurance. We will pay half the price of insurance on one bull per customer. If an injury to a bull is not covered under insurance during this 90 day period, we will attempt to provide a suitable replacement bull. If one of equal value cannot be provided, we will issue a sale credit to be used in a future sale. This credit will be equal to the purchase price minus the salvage value of the animal. Please contact us as soon as possible after a condition is observed that prevents the bull from being able to function as a breeder, and before he is sold.

Insurance forms will be available from Ray Trudeau of Martin-Trudeau Insurance Company. (605-996-3106) Mitchell, SD.

Directions to Sale Facility:

Sale facility is located on the northeast edge of Kimball, S.D.

Thank You:

Special thanks to Rudy Niewenhuis, Case Blom, and Leroy Blom of Professional Alliance, Platte, SD for helping sponsor and serving the lunch.

Catalog design and printing by:

Quick Reference to ASA EPDs and \$ Indexes

Expected Progeny Differences (EPDs): EPDs are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For example, if sires A and B have EPDs of +10 and -5, a 15-unit difference would be expected in their progeny (moving from -5 to +10 yields 15 units). Key to using EPDs is knowing what units they are expressed in. For example, if the above case referred to weaning weight EPDs, A would be expected to sire 15-pounds more *weaning weight* than B. If calving ease were the trait, A would be expected to sire 15-percent more *unassisted births* in first-calf heifers; in other words, if B sired 30 assists in a group of 100 heifers, we'd expect A to require 15 assists. A percentile-ranking chart is required to determine where a bull's EPDs rank him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit www.simmental.org. Listed below are the units ASA EPDs are expressed in:

All-Purpose Index (API): Dollars per cow exposed under an all-purpose-sire scenario. (See below for more details.)

Back Fat (BF): Inches of backfat.

Birth Weight (BW): Pounds of birth weight.

Calving Ease (CE): Percent of unassisted births when used on heifers.

Carcass Weight (CW): Pounds of carcass weight.

Maternal Calving Ease (MCE): Percent of unassisted births in first-calving daughters.

Milk (MLK): Pounds of weaning weight due to milk.

Marbling (MRB): Marbling score.

Maternal Weaning Weight (MWW): Pounds of weaning weight due to milk and growth.

Ribeye Area (REA): Square inches of ribeye.

Warner-Bratzler Shear Force (WBSF): Pounds of force required to shear a steak.

Stayability (STAY): Percent of daughters remaining in the cowherd at 6 years of age.

Terminal Index (TI): Dollars per cow exposed under a terminal-sire scenario. (See below for more details.)

Weaning Weight (WW): Pounds of weaning weight.

Yearling Weight (YW): Pounds of yearling weight.

Yield Grade (YG): Yield grade score.

\$ Indexes: Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

All-Purpose Index (API): Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

Terminal Index (TI): Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield.

Using API and TI: First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. Or, put another way, how much you can pay for one bull compared to another. For example, when buying an all-purpose-type sire, you can quickly figure a bull scoring +100 for API is worth an extra \$6,000 over a +50 bull if both are exposed to 30 cows over 4 years (\$50 diff. x 30 hd. x 4 yr. = \$6,000). A percentile-ranking chart is required to determine where a bull's index value ranks him relative to other bulls in the breed. For percentile rankings or more detailed information about EPDs and \$ indexes visit www.simmental.org.

Important disclaimer: DO NOT compare index values of purebreds of different breeds, hybrids of different breed composition or purebreds with hybrids - our system was not developed to make valid comparison among these groups. Therefore, you must first determine the breed and breed composition appropriate for your herd and use index values to compare animals within that population.

Buying online is as easy as 1, 2, 3...

1. Create an account at www.dvauction.com under the "register" tab
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction-a DV representative will notify you once you have been approved
3. Tune in for the sale and make you purchases!

After the sale, contact the sale manager or owner to arrange transportation and payment. **High speed internet** is required for successful bidding-be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy Bidding-if you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

Having troubles?

During the auction, you can type a message to the operator at any time for assistance. Our full-time support team can also always be reached at (402) 474-5557.

Dam: 1 calf/121 WWR

Tested homozygous black and homo polled. One of the most powerful and complete bulls we have raised. Thick topped, deep bodied with extra muscle and the best disposition in the pen. This is a top herd bull and he just keeps getting better. Light BW, 3rd top WW, 2nd top ADG, and check out his breed leading EPD's. He had the highest Adj. YW at 1460#. By the way he ratioed 121 at weaning. We definitely plan on using semen on this bull in our herd.

Dam: 6 calves/102 WWR

Nice growth bull out of the Stepping Stone bull we raised. He is parent verified because we first thought he was by our Crimson bull. Either way he is a good young bull with impressive WW. Tested heterozygous black.

Dam: 2 calves/101 WWR

Outstanding growth in this mid-April calf. Adjusting at 779 pound WW. Blaze face bull with plenty of length. Tested homo polled.

Dam: 7 calves/103 WWR

The youngest calf in the sale but you wouldn't know it by his growth and performance. Baldy bull with a lot of potential. Dam by the In Focus bull that was one of our favorites.
